Name:Nurdaulet Yermekbay

Group:MT-2405
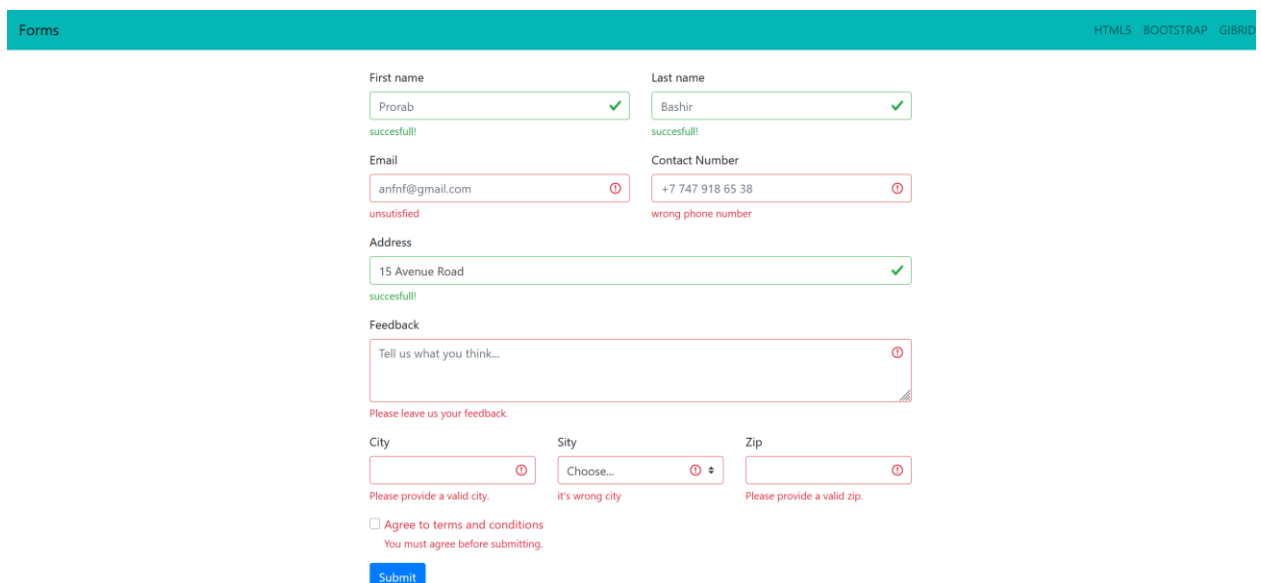

so here is my web site where was included all 3 task and conbined with each other by the navbar of bootstrap but in case of pure html5 code I was used regarding the criteria and added links and bootstrap code only for purpose of navbar workage

so here is the web site

Here is the workable navigation difference when I click it's seems blue and when you type valid data border will change color to green if not will change into red one also add some pattern to make the notification of invalid data type

Here is the boostrap code I also somehow wants for the workable validation for him and add the pattern and title for the html and add css respectively for red and green functionality and here is the also the notification rightness like successfully and stuff like this

the mix of the html5 and bootstrap
here I make exactly the same one navbar code for that but in case of this page it did not work so I will neiled it during the defense maybe then here is the mix of the pattern and grid lauout of the bootstrap also add the radio format and some checkboxes too

so what about the code here it is

```

    <!-- No JavaScript included -->
ody>

tml>
```
here is final one gibrid of the boo and html5 code including the css

```css
# gibrid.css > .form-title
1    .form-container {
2        max-width: 700px;
3        margin: 2rem auto;
4        padding: 2rem;
5        background-color: #f8f9fa;
6        border-radius: 10px;
7        box-shadow: 0 0 10px rgba(0, 0, 0, 0.1);
8    }
9
10   .form-title {
11       text-align: center;
12       margin-bottom: 1.5rem;
13   }
```

so that is all for the report of that assignment
